

EZRA RAHMADITYA

Depok, Jawa Barat, Indonesia | ezarahmadityaa@gmail.com | 082113118380
ezarahmaditya.vercel.app | github.com/ejerai

Semester 5 Information Technology student at Budi Luhur University with hands-on experience delivering full-stack web applications — from freelance client projects to independent builds using React, Astro, Laravel, and PHP. Combines a Machine Learning academic focus with practical front-end engineering skills, particularly in performance optimization, UI/UX. Comfortable working independently across the full project lifecycle, from client requirements to deployment.

TECHNICAL & CORE SKILLS

Machine Learning & Data Science

- Data Preprocessing, Text Classification, Sentiment Analysis, Predictive Modeling, Supervised/Unsupervised Learning.

Front-End Development

- JavaScript, Astro, NextJs, PHP, Typescript, Responsive Web & Clean Design, Technical SEO & Web Performance, UI/UX Optimization.

Tools & Platforms

- Git, GitHub, Visual Studio Code, Supabase, MySQL, MongoDB, Vercel (Deployment).

AI-Assisted Development

- AI Pair-Programming (Claude), Debugging & Code Review, Prompt Engineering for Dev Workflows, Rapid Prototyping & Documentation.

PROFESSIONAL EXPERIENCE

Web Developer & Content Creator | Self-Employed / Freelance

Oktober 2024 - Present

- Architected, developed, and maintained a content-driven website utilizing Semantic HTML, CSS3, and JavaScript with a heavy focus on Technical SEO to maximize organic traffic.
- Successfully optimized web performance, page loading speeds, and mobile responsiveness, leading to official approval and integration into the Google Search Machine or SEO Website.
- Implemented interactive UI/UX features, product catalog filtering, and secure user flows to ensure a seamless transaction experience for the campus community.

PROJECTS

[Struckln](#)

- Built a full-stack expense tracking web app using React, Vite, and Supabase, integrating Google Gemini AI to automatically extract structured data from scanned receipt images.
- Designed an interactive analytics dashboard with Chart.js to visualize spending patterns, giving users clear insight into their financial habits.

[PT. Bintang Surya Teknik Persada | Company Profile Website](#)

- Built and deployed a company profile website for an industrial equipment distributor using Astro and vanilla JavaScript, featuring a searchable and category-filterable product catalog across multiple industrial component types and SEO Website.

[Laundry Service Management Platform](#)

- Built a full-stack laundry management platform with PHP and MySQL, featuring real-time order status tracking, Midtrans payment gateway integration, and a tiered customer reward-point system.
